Innovation Procurement in Big Science

Innovation procurement enables Big Science Organisations (BSOs) to address unmet needs by working with industry and Industrial Liaison Officers (ILOs) to develop and deploy solutions that create value, manage risk and strengthen long-term capability.

WHY INNOVATION PROCUREMENT MATTERS

Big Science relies on advanced technologies and complex systems. Many of today's challenges have no off-the-shelf solutions. Innovation procurement provides a structured way to work with the market to create and bring new solutions to operational use.

THE INPROCAP APPROACH

INPROCAP provides guidance, training and practical tools to help BSOs and ILOs apply innovation procurement effectively. Our approach covers the full journey - from identifying needs to deploying innovative solutions.

BENEFITS

Create value: deliver solutions that improve performance and efficiency.

Manage risk: share risk with suppliers during development.

Strengthen capability: build knowledge, skills and long-term capacity.

Stimulate innovation: encourage new ideas and technologies in the market.
